Objective

Highly motivated individual seeking employment with a company that values their employees skills as well as embraces their individuality. Looking to become a javascript developer, in particular back end software development, as it is a key strength of mine and is where I hope my career takes me. Having worked in tech support for various companies over the past 13 years has given me a foundation for it. Problem solving with creative solutions has proven to be a valuable skill to help me excel in software development.
